Re: SV: EPA STAR Grant R830758-01-0

Boston University agreement to the transfer of this grant proposal from Boston University to Harvard University

Dear Ms. Deener:

Originally, this grant proposal was submitted to the EPA by Dr. Philippe Grandjean at Boston University School of Public Health. Before the award could be finalized, Dr. Grandjean accepted a position at the Harvard School of Public Health. He will be leaving Boston University SPH, Department of Environmental Health, as of December 31, 2002.

Dr. Grandjean has requested that the grant be awarded to him at Harvard. He has been in contact with the research administration staff there to start the transfer process. Boston University-based activities included in the project will be included in a subcontract originating from Harvard School of Public Health.

We look forward to collaboration with Harvard to aid progress of this important research.

Joseph Barabino
Director, Office of Research Administration
Boston University Medical Campus
